

PRO BONDER

CAROUSEL™

A revolution in bonding embellishments onto textiles

Pro|Bonder Carousel combines the most advanced electronics, pneumatics, and engineering, to bring you the most versatile application/bonding machine available today. In a World where order sizes are both long and short runs; where embellishments are hugely varied from ultra-thin heat transfers to multi-layered fabric composites; textile providers have massive challenges to apply each type efficiently.

Pro|Bonder Carousel is the route to profitable output, and the only answer for larger players. Whether you specialize in high volume, repeated long runs, or bespoke/personalized orders, **Pro|Bonder Carousel** provides you with the solution. Equally relevant to the garment factory applying embellishments at 'needlepoint' and the 'aftermarket' provider of fully decorated finished garments in the consuming market; **Pro|Bonder Carousel** is your answer.

Key features:

- 8 application heads, circular, carousel.
- Fully Automatic or Manual operation
- Output up to 800 items per hour with 3 operators
- Simple for the operator, advanced controls for management/supervision
- Individual head and/or universal heat control
- Individual head and/or universal air pressure control
- Individual head and/or universal time control
- Fail safe on both heat and pressure settings
- Comprehensive statistical analysis for each head, and across a network of machines
- Online remote support through internet connectivity
- Expert installation and training
- Comprehensive warranties and service package

Technical specifications

Dimensions	3600 mm radius x 1850 mm high
Weight	2000 kg
Electrical requirement	3x 400V +N +E; 40Amps; 50-60 Hz
Compressed air requirement	8BAR inlet pressure; 500 litres/minute
Standard plate size	Std heat and base plates 400 x 500 mm; Junior base plate 380 x 380 mm sleeve plate 380 x 150 mm
