

# PRO | BONDER DUAL™

A revolution in bonding embellishments onto textiles

## Pro-Bonder Swinghead Heat Press- a failsafe, easy to use, pneumatic heat press

Pro|Bonder combines the most advanced electronics, pneumatics, and engineering, to bring you a truly excellent, and robust, heat press. Its failsafe mechanisms make it impossible to operate when the application parameters are not being met. This prevents mistakes happening, particularly at the beginning of shifts when the machines are warming up, and compressors start up.

### Key features:

- 1 application head, 2 base plates.
- Double button operation - prevents hands getting trapped
- Heavy construction to maintain applied pressure throughout pressing cycle
- Ergonomic design for comfortable operation
- Failsafe mechanisms prevent application errors
- Preset recipes for application parameters
- Data collection for output analysis
- Junior and sleeve size base plates available
- Quick plate change for efficient operation

Technical specifications	
Dimensions	690mm high x 972mm wide x 921mm deep
Electrical requirement	230V single phase; 50-60Hz
Compressed air requirement	8 Bar (112psi) feed pressure
Heat platen size	400mm x 500mm
Base Platen sizes	400mm x 500mm (Std); options 380mm x 380mm (junior), 380mm x 150mm (sleeve); other sizes made to order.

## PRO BONDER CAROUSEL™

### Pro Bond 8 Head Carousel - heat press - the biggest revolution in Textile Embellishment application!

#### Key Features:

- Automatic or manual operation - completely fail safe- eliminates application errors
- Up to 800 applications per hour - hugely efficient
- Full management data collection and analytics - manage your floor with ease
